To: [Customer Name]

Oct 14th, 2013

Subject: Obsolescence of LTC2641CS8-16 and LTC2641IS8-16

This letter is intended to notify you that Linear Technology Corporation is obsoleting the SO-8 package versions of the LTC2641-16 device. The primary reason for this obsolescence is that the special bond wire used to create this product has been obsoleted.

Customers may wish to redesign to accommodate the LTC2641 device in the 8-pin 3mm x 3mm DFN or 10-Lead MSOP footprint. Please see LTC2641 datasheet for more details.
www.linear.com/LTC2641-16

Linear Technology will be offering a Last Time Buy (LTB) in accordance with the schedule below.

Formal Announcement:	Oct 14 th 2013
LTB Orders Accepted Starting:	Oct 14 th 2013
Final Orders Accepted:	April 30 th 2014
Final Shipments:	October 30 th 2014

We recognize the need for continued support and coordination between our companies during this transition and so, we have provided this six month order placement window, followed by an additional six month window in which to receive shipment.

If we can provide any additional design or technical assistance, please feel free to contact a Linear Technology representative or our Marketing and Applications Engineering staff at (408) 432-1900.

Sincerely,
Linear Technology Corporation
