

Dear distributors in Japan,.

PCN162504 implementation timing extension

Cypress has informed PCN162504 implementation timing is extended from the end of September to December in 2016 as customer request date (CRDATE) basis of these backlogs, this is special-deal only for Japan customers.

If distributors in Japan want to have existing parts (before PCN162504) for your customer demands, please build backlog by WW52.5 and CY plan to ship before LTS.

If Cypress cannot ship by the below LTS caused by our operational reason, Cypress will support existing parts for each order basis.

Last time buy (LTB)	2016WW44.5 (November 4 <sup>th</sup> 2016)
Last time ship (LTS)	2016WW52.5 (December 31 <sup>th</sup> 2016)

Thank you for having business with us and we hope our business be expanded with you in future.

Sincerely,

Changhak Lee  
Senior Staff Manufacturing Engineer

Memory Product Division
