Product	Digi XBee S1 Non-PRO

Reason for Change

Technical Requirement	Product Transition
Customer Requirement	Product Discontinuation
Quality Improvement	Product Enhancement
	Other (Brand Change)

Description of change	Due to product family consolidation, the Digi XBee S1 Non-PRO product line will be phased out. Earlier this year, we announced the End of Life on the Digi XBee S1 PRO model. The Digi XBee 3 is a drop in replacement for the Digi XBee S1 Non-PRO and is a form, fit, and functional equivalent. The XBee3 provides the following enhancements over Digi XBee S1:
	• Increased range and receiver sensitivity
	• Programmability with MicroPython
	• Bluetooth low energy functionality

Affected Part Numbers	See Appendix

Timing of Change	Effectivity dates-See Appendix

Technology Introduction	2000

Last Time Buy	See Appendix

Quality Issues	None

Notes	Additional Information
	- Customers will have to re-certify their end product for regional regulatory requirements (e.g. FCC Part 15 unintentional radiator) - The whip antenna variant of XBee S1 is no longer available on XBee 3 and is instead replaced with an integrated PCB antenna variant. Range testing was performed to verify similar wireless performance between these two variants. - Compatibility report with performance testing of Digi XBee 3 integration into an existing S1 network, Migration guides for 802.15.4 and DigiMesh are attached - Last time shipments will be completed by September 30, 2019 - Pricing will increase by 10% for orders received after March 29, 2019 *The replacement part numbers are pre-configured with Zigbee protocol firmware. The modules can be re-programmed to run either 802.15.4 or DigiMesh protocols using the Digi XCTU utility or via an external host microcontroller **Samples availability** Please contact your Digi Sales Rep.
