Removal of Test Site Marking from Trace Code

Description

NXP Semiconductors announces the standardization of trace code marking for the devices associated with this notification. The test site character will be removed from the product part marking for those parts that currently include it. Part traceability is not affected by this change. Customers will continue to receive both trace code markings until inventory is depleted.

After WW29 (20Jul'19) customers can expect to see either trace code markings.

Corresponding ZVEI Delta Qualification Matrix ID: SEM-PA-13

Reason

NXP is standardizing the trace code marking.

Identification of Affected Products

Top side marking
See attached file with examples of new marking.

Anticipated Impact on Form, Fit, Function, Reliability or Quality

No impact to fit, function, reliability or quality - only impacts form.

Disposition of Old Products

Existing inventory will be shipped until depleted
